- Assigned To set to Marc Neuhaus

On my train ride back home from T3Con12 i've started to implement this, here's my initial result:

#### #2 - 2012-10-08 10:54 - Marc Neuhaus

Here's my current implementation.

There's a commandController to fetch all packages.json and put them under DATA/Packages/%RepositoryDomain%/\*.json and filter them to compile an packages-typo3-flow.json file, which is read by the FrontendController to show the packages
