Subject:	Consider localizeReferencesAtParentLocalization for group/db		
Description	Currently the TCA config property localizeReferencesAtParentLocalization for database relations is only supported for select types with an accordant foreign_table defined. However, the whole procedure is valid but not checked for group/db fields as well.

I am having just this problem with group/db and mm relations. Patch set 3 worked fine for me (TYPO3 6.2.5, PHP 5.3), but I needed to remove "&& empty(\$mmTable)" in line 3317. Could you include a proper solution for group/db with mm relations?
