Sprint Focus:			
Subject:	Rename Log Interfaces "Writer" and "Processor" to "WriterInterface" and "ProcessorInterface"		
Description	<p>When parsing the Logging API with the class parser for adding namespaces, the interfaces somehow got wrong names. We have</p> <ul style="list-style-type: none">- "Writer" instead of "WriterInterface" in TYPO3\CMS\Core\Log\Writer and- "Processor" instead of "ProcessorInterface" in TYPO3\CMS\Core\Log\Processor <p>The interfaces should be renamed (including the filename) and get adapted in all classes which implement these interfaces.</p> <p>IMHO this is a RC critical bug, because it will be a breaking change in future releases.</p>
