<b>Subject:</b>	Enhance site import/creation step		
<b>Description</b>	<p>The site import / creation step is a bit confusing. See screenshot.</p> <p>It would be cool if the lower section would only become active if "[New site]" is selected in the selector. Or if the selector would become disabled as soon as something is entered in the form fields. That would make it clear what will happen (import? creation? both?) when clicking next.</p>
