Sprint:	
PHP Version:	
Has patch:	No
Complexity:	
Subject:	Make PATTERN_MATCH_PACKAGEKEY more strict (again)

Description
The pattern used to check for a valid package key was made less strict during composer integration. Although composer itself imposes almost no restrictions, packagist requires a "vendor/name" format. Our pattern should thus at least ensure the key contains a dot (translated from the slash).

[TASK] Tighten package key check a little

The pattern used to check for a valid package key was made less strict
during composer integration. Although composer itself imposes almost no
restrictions, packagist requires a "vendor/name" format.

This changes thus adjusts the PATTERN_MATCH_PACKAGEKEY constant to
require a dot in the package key.
