

TYPO3.Flow - Bug # 42434

Status:	Resolved	Priority:	Should have
Author:	Ferdinand Kuhl	Category:	Session
Created:	2012-10-26	Assigned To:	Robert Lemke
Updated:	2012-10-29	Due date:	
PHP Version:	5.3		
Has patch:	No		
Complexity:	easy		
Affected Flow version:	Git 1.2 (master)		
Subject:	Resource handler not available when session is initialized		
Description	<p>In current master (and all earlier releases) the bootstrap initializes the session before the resource wrappers. If you now try to attach an Image(Variant) from TYPO3.Image to a session, this Variant first checks (during initializeObject()) if the resource is available - which simply is not possible at the session __wakeup event, as there are no registered stream-wrappers yet.</p> <p>I suggest: Change the order and let session and resource - Steps swap their places.</p>

[BUGFIX] Initialize resource wrapper before session

If you try to attach a resource-dependent object to a session, this will fail, as the `_wakeup()` method is called before the resource wrappers are initialized.

This patch makes sure that the resource framework is initialized before the session framework in the standard runtime sequence of the bootstrap.

Fixes: #42434

Releases: 1.2
