

TYPO3.Form - Bug # 42562

Status:	Resolved	Priority:	Should have
Author:	Martin Brüggemann	Category:	
Created:	2012-10-31	Assigned To:	Bastian Waidelich
Updated:	2013-10-29	Due date:	
Subject:	Interrupt form rendering when redirect finisher is triggered		
Description	<p>There's a bug, that outputs content while a POST request is beeing processed by Flow. There should only be one redirect to the show action after the POST request has been processed. Otherwise it's very strange to see the "old" content after the POST data has been sent (f.e. after having added a comment but it's not there after the first redirect).</p>

Revision 94051a11 - 2013-10-21 16:58 - Bastian Waidelich

[BUGFIX] Make RedirectFinisher interact with main response

This makes sure that redirection headers & content are set in the main Response object not in the SubResponse of the Form runtime.

This avoids flickering and invalid HTML.

Change-Id: Ide095f358277f9787d54ff14fe9f4e32a7a6b06b

Fixes: #42562
