<b>Subject:</b>	Make all setup steps accessible again		
<b>Description</b>	<p>At the moment some setup steps seem to be broken.</p> <p>I have a running site but started the setup again to create an admin user: After selecting the database I got directly redirected to the congratulation screen with the homepage link.</p> <p>Independent on the current site status it should always be possible to have access to all setup steps (user create, site create/import, ...).</p>
