

TYPO3.Flow - Bug # 42770

Status:	Resolved	Priority:	Should have
Author:	Aske Ertmann	Category:	MVC - Routing
Created:	2012-11-07	Assigned To:	
Updated:	2012-11-28	Due date:	
PHP Version:			
Has patch:	No		
Complexity:	medium		
Affected Flow version: Git 1.2 (master)			
Subject:	Routing includes parameters from the current request		
Description			
<p>I believe that after https://review.typo3.org/#/c/15261/ some routing arguments from the current request is passed along to all new links created with the uri builder. This should not happen and leads to some very weird side effects.</p> <p>I need to look further into the problem, but so far I've found that it happens for requests to the node controller ext direct service in Neos and as well for modules. The modules has a very special route part handling, so that is probably not the best place to start.</p> <p>An example is the page tree making a request for the nodes and that request uses the uri builder to create links to the nodes, but those links are appended with the ajax request's parameters which of course they shouldn't.</p> <p>Example "nodeData[contentType]=TYPO3.Neos.ContentTypes:Page&nodeData[properties][title]=test&position=into&@subpackage=&__csrfToken=4cc446feb743b38a5f47db7fc500251e" is added to the links</p>

Revision feeb87c5 - 2012-11-28 10:24 - Marc Neuhaus

[BUGFIX] Exclude parameters of the current request from created URIs

Since <https://review.typo3.org/#/c/15261/> the arguments of the current/uri-building-origin request were added without although addQueryString was FALSE.

The UriBuilder now only keeps the requestArguments on non-involved requestNamespaces.

Resolves: #42770

Releases: 1.2

Hi Aske,
did you already find out more?

I stumbled upon paginators not working any more (you can't get back to the first page, because the UriBuilder will always append the widget arguments of the current request)..

#2 - 2012-11-25 18:14 - Marc Neuhaus

I can confirm this issue, current request arguments aren't reset for the request generating a uri.

The issue seems to be here:

<http://git.typo3.org/FLOW3/Packages/TYPO3.FLOW3.git?a=blob;f=Classes/TYPO3/Flow/Mvc/Routing/UriBuilder.php;h=b6362fde334fe39c316353d37b459ea97cb4df1;hb=febf00eadefe768c1e8415fc6faac6b1f84c81bc#l420>

I'll try to dig deeper tonight/tomorrow
