Hi Rasikh,

Was this with the alpha release or did you grab it from GIT? What I can understand this error is connected to a missing file or missing database table or field.

It was an alpha release, I downloaded from this page. http://neos.typo3.org/download.html.

Where can i get git details, may be the lastest code is working.

Hi Rasikh,

Here you have the installation instructions for getting the latest for GIT master: http://neos.typo3.org/documentation/gettingstarted/installation.html

Unless more details on the error are provided it's close to impossible to help. Judging from the time passed since your first (quick) feedback it seems this is either hopeless or solved. If not, feel free to reopen. Enjoy!
