DEV3 - Bug # 42991

Status:	New	**Priority:**	Must have
Author:	Christian Tauscher	**Category:**	
Created:	2012-11-15	**Assigned To:**	
Updated:	2012-11-15	**Due date:**	
Subject:	*.ts file, ftp access can't be opened		

Description

TYPOscript files are named *.ts

I am Accessing files via build in ftp-Connection, trying to open a *.ts file (correct TYPO3 Icon) end up with a simple ERROR Message. The file may be open correctly as TYPOscript as long as it is a local file.

Workaround: open remote TS file in Text-Editor without syntax-checking :-(

The issue is tested with:

eclipse: Juno/Indigo
Java: Oracle/openJDK
Aptana: Plugin V2/V3
Ubuntu 10/11/12

Thank you for this plugin, it's a great help

Christian.
