

Core - Bug # 43080

Status:	Closed	Priority:	Must have
Author:	Philipp Gampe	Category:	Extension Manager
Created:	2012-11-18	Assigned To:	
Updated:	2015-01-09	Due date:	
TYPO3 Version:	6.0		
PHP Version:	5.4		
Complexity:	medium		
Is Regression:	No		
Sprint Focus:			
Subject:	Can not install extension if mirror list can not be fetched		
Description			
<div><ul style="list-style-type: none">- Let the mirror list expire by not updating the extension list for several days (or make the extensionmanager believe it needs to fetch the mirror list on next run)- try to install a local extension- fatal error</div>			

History

#1 - 2012-11-18 19:15 - Philipp Gampe

Strange, since I update the extension list, this works without problems. I truncated the extension list, removed all files from typo3temp and reset the timestamp, but I can not reproduce the error any more.

This was the error (found it in sys_log), but unfortunately the stack trace has been lost :(

```
Core: Exception handler (WEB): Uncaught TYPO3 Exception: #1342635425: Could not access remote resource

```

The line difference is from a git pull in between.

#2 - 2012-11-18 19:34 - Philipp Gampe

This does happen only if a dependency is not fulfilled, e.g. install <https://github.com/NamelessCoder/schemaker> without having flux installed.

#3 - 2012-11-19 09:15 - Patrick Broens

- *Target version set to 6.0.0*
- *Complexity set to medium*

#4 - 2012-11-27 01:20 - Philipp Gampe

Forgot the add my investigations ... this happens only if you have **no** network connection.

#5 - 2015-01-09 11:54 - Mathias Schreiber

- *Status changed from New to Closed*
- *Is Regression set to No*

Taken into account in #63909.

The issues are not linked on purpose, so the refactoring ticket does not get bloated with relations.
