TYPO3 Version:	6.0		
PHP Version:			
Complexity:			
Sprint Focus:			
Subject:	Create wizard to remove/rename LocalConfiguration-settings		
Description			
<p>When discussing #43085 on typo3-core-mailinglist around 30th October 2012 Christian Kuhn mentioned as a side-note:</p> <p>"There is also one missing piece in this area: We still have no wizard or something to remove or rename LocalConfiguration settings. This could be a nice task for 6.1 and is codewise easy going with the new configuration api. This way we could drop obsolete settings like 'extList_FE'. It would be great to see one central handler in the install tool for such things."</p>

History

#1 - 2013-09-14 22:52 - Christian Kuhn

- Status changed from New to Resolved
- Target version changed from 6.1.0 to 6.2.0
- % Done changed from 0 to 100

This is handled in 6.2 install tool now.
