

TYPO3.TYPO3CR - Bug # 4317

Status:	Resolved	Priority:	Should have
Author:	Tommy Seus	Category:	FLOW3 Persistence
Created:	2009-08-25	Assigned To:	Karsten Dambekalns
Updated:	2011-05-05	Due date:	
Subject:	Still Problems with SplObjectStorage duplicates		
Description			
My Version is Revision r3094			
There are still problems with the SplObjectStorage duplicates (Issue #3819).			
I have attached my script. In addition, the blog model must be expanded.			
Step1: creating a Blog creating a Post1 creating a Post2 add Post1 to Blog			
Step2: add Post2 to Blog			
Step3 detach Post1 from Blog

- *File Backend.php added*

Hello, I tried to find a solution. In the initial state will always generate a ItemNode without checking to see if it already exists. My modification performs this check and this triggers the problem of duplicate entries when adding (ATTACH).

Removing (DETACH) of objects is more complicated. Here are 2 lists "compared". Once the new list, ahead of objects are removed. In the second list, the database objects are stored. If in the first list an item missing, this will be deleted from the second.

I hope this solution inspires you.
