Subject:	Sorting is broken/weird		

Description

Clicking on the A/D-column I expected to see all activated and deactivated grouped together. Although the sorting "changes" somehow, it's still mixed/weird.

- Target version set to 6.0.0

Problem is that there is no real content in that column. It's only links, spans, etc.

A solution could be to have the label 'activate', 'deactivate' in that column, but then the styling must be modified to hide those labels.
