TYPO3.Neos - Bug # 43306

Status:	Resolved	**Priority:**	Must have
Author:	Cedric Ziel	**Category:**	UI
Created:	2012-11-26	**Assigned To:**	Christian Müller
Updated:	2012-11-26	**Due date:**	
Subject:	Non existing Argument in Fluid ViewHelper throws Exception in Backend Widget		

Description

Hi,

After a fresh installation off Neos, it directly throws Exceptions if you switch Modules in Backend.

This is because in TYPO3.Neos/Resources/Private/Templates/Module/Widget.html, unregistered Argument "uri" in ViewHelper
"f:uri.resource" is used.

Changing the Argument Name in the ViewHelper to path corrects this issue.

Before:

```
<f:if condition="{submoduleConfiguration.icon}">
            <img src="{f:uri.resource(uri: submoduleConfiguration.icon)}" class="pull-right" />
        </f:if>
```

After/Fix:

```
<f:if condition="{submoduleConfiguration.icon}">
            <img src="{f:uri.resource(path: submoduleConfiguration.icon)}" class="pull-right" />
        </f:if>
```

I think this one is urgent cause it breaks the whole Backend.

[BUGFIX] Adjust Neos to changed resource ViewHelper in Fluid

The resource ViewHelper no longer has a uri property so Neos
uses path now in the module widget.

Fixes: #43306
Change-Id: If9ee151b95bb0dfd1632852ae4de95cc051105ab
