<b>Sprint Focus:</b>			
<b>Subject:</b>	Media element does not render any output		
<b>Description</b>	For content elements of type media no output is generated (except the headline)		

### History

#### #1 - 2014-09-24 12:44 - Felix Kopp

- Parent task set to #61842

- Is Regression set to No

#### #2 - 2015-05-02 23:57 - Riccardo De Contardi

- Status changed from New to Closed

The issue seems not present in TYPO3 6.2.12, php 5.6.7

My test:

1) create a new CE "Media"

2) upload all the files for the test, from <http://techslides.com/sample-webm-ogg-and-mp4-video-files-for-html5>

3) upload the swf file small.flv, attached

4) set the file in the tab "Video Element > Path or URL to fallback video source (Flash or QuickTime)"

5) check HTML5 / accessible rendering

6) add the files

small.webm

small.ogv

small.mp4

the only file that was not added was the 3gp (not recognized as a valid video file, I guess)

I also tried with a .swf file without HTML5 / accessible rendering, but the media element always works.

If you think that this is the wrong decision or experience this issue again, then please write to the mailing list [typo3.teams.bugs](mailto:typo3.teams.bugs) with issue number and an explanation or open a new ticket and add a relation to this ticket number.
