[TASK] Removing alert when HTML selector wasn't found

When a page, a user visits, has a different html structure as the page before it has to be fully reloaded by 'window.location.href = uri;'. So nothing really went wrong as it was announced.

Especially after creating a new page the HTML structure is not the same. So the user would have to handle an alert every time although nothing went wrong.

Change-Id: I68dc20699ca246f9b1f8b1d1245d7b9e109efc3f

Resolves: #43479
