Affected Version:			
Subject:	TV does not respect "Show in Section Menus"		
Description	<p>After upgrading to 1.7.0 we found out, that TV is not respecting the above mentioned setting in the page properties anymore. It will show <i>any</i> content in section menu.</p> <p>Furthermore even hidden content is included in the section menu.</p> <p>-> Copied from http://bugs.typo3.org/view.php?id=18524</p>

- Target version set to 1.9.1

#2 - 2014-05-19 09:42 - Christian Nölle

Just to clarify this, as the old bugs.typo3.org is not accessible any more and the solution was recorded on this:

One has to change in ext_localconf.php round abtou line 17

```
//sectionIndex replacement
$tvSetup[] = 'tt_content.menu.20.3 = USER
tt_content.menu.20.3.userFunc = tx_templavoila_pi1->tvSectionIndex
tt_content.menu.20.3.select.where >
tt_content.menu.20.3.indexField.data = register:tx_templavoila_pi1.current_field
';
```

to

```
//sectionIndex replacement
$tvSetup[] = 'tt_content.menu.20.3 = USER
tt_content.menu.20.3.userFunc = tx_templavoila_pi1->tvSectionIndex
tt_content.menu.20.3.select.where >
tt_content.menu.20.3.indexField.data = register:tx_templavoila_pi1.current_field
tt_content.menu.20.3.renderObj.if.value.field = sectionIndex
tt_content.menu.20.3.renderObj.if.equals = 1
';
```
