<b>Complexity:</b>			
<b>Subject:</b>	AuthenticationManager logout should destroy session explicitly		
<b>Description</b>			
The session is currently destroyed through a signal emitted on logout (loggedOut). The AuthenticationManager should check if the session is started at all and should allow signal receivers to inspect the session before destroying it.

[FEATURE] Destroy session explicitly in logout

This change moves the call to Session->destroy() from a signal to the AuthenticationProviderManager that already has the current session as a dependency.

The "emitLoggedOut" signal is emitted before the session is destroyed to allow other slots to inspect the session.

Change-Id: I7f70f930b6060c3ad031ae4278d264681b812036

Releases: 1.2

Resolves: #43575

### History
