<b>Subject:</b>	0018524: TV does not respect "Show in Section Menus"		
<b>Description</b>	<p>After upgrading to 1.7.0 we found out, that TV is not respecting the above mentioned setting in the page properties anymore. It will show <i>any</i> content in section menu.</p> <p>Furthermore even hidden content is included in the section menu.</p> <p>I don't know if it is related, but it appeared with TV 1.7.0: tt_content.menu.20.3.wrap is applied two times.</p> <p>Downgrading to tv 1.6.1 solves that problem</p> <p>This issue might be a duplicate of 0018474</p>
