Sprint Focus:			
Subject:	array_merge_recursive_overrule: __UNSET can't unset array values		
Description			
<p>If the \$enableUnsetFeature parameter is true, array_merge_recursive_overrule you can unset values from the first array. The phpDoc says:</p> <p>* @param boolean \$enableUnsetFeature If set, special values "__UNSET" can be used in the second array in order to unset array keys in the resulting array.</p> <p>But in fact keys are only unset if they don't hold an array value. I see no reason why this should be like this. There should be the possibility to unset array values.</p>

Revision c0defbe7 - 2013-01-14 20:10 - Sebastian Michaelsen

[BUGFIX] array_merge_recursive_overrule: __UNSET for array values

Using __UNSET on keys that hold array values does not unset them.
However the documentation does not mention this restriction.
Therefore this is considered a bug and fixed by this patch.

Resolves: #43874

Releases: 6.1, 6.0, 4.7

History

#1 - 2012-12-11 12:30 - Markus Klein

Although this feature is not used in the Core at all, we can't change that behavior easily since this is public API.

Hence this would require a deprecation period of at least two versions first.

#2 - 2012-12-11 14:23 - Sebastian Michaelsen

I don't agree. It just changes the feature in a way to behave like it was documented.

It's very unlikely that someone used __UNSET on an array value which he doesn't want to be unset. So I don't expect anything to break.

#3 - 2012-12-13 16:28 - Tobias Liebig

- Category set to Backend API

- Complexity set to easy

#4 - 2012-12-13 16:29 - Tobias Liebig

I also think this change won't break anything.
