PHP Version:			
Has patch:			
Complexity:			
Subject:	EmptyView is misleading		
Description			

When no template is found, FLOW3 uses \F3\FLOW3\MVC\View\EmptyView as view (see ActionController::resolveView()).
Instead we should use the NotFoundView that was introduced in r2888 to display a more meaningful error to the user.

So instead of:

    if ($viewObjectName === FALSE) $viewObjectName = 'F3\FLOW3\MVC\View\EmptyView';

something like

    if ($viewObjectName === FALSE) {
        $view = $this->objectManager->getObject('F3\FLOW3\MVC\View\NotFoundView');
        $view->assign('errorMessage', 'dummdidumm');
    }

Then EmptyView could be removed I guess..

The empty magic call method from EmptyView should be added to the NotFoundView to prevent PHP from issuing a fatal error when calling non-existing methods.
