TYPO3.Flow - Bug # 4409

Status:	Closed	**Priority:**	Should have
Author:	ziyad saeed	**Category:**	Object
Created:	2009-08-31	**Assigned To:**	Karsten Dambekalns
Updated:	2010-10-20	**Due date:**	

PHP Version:	
Has patch:	
Complexity:	
Affected Flow version:	
Subject:	@inject comment property isn't working

Description

In the Getting Started guide, a blog controller is created that has a blogRepository property.

```
/**
 * @var \F3\Blog\Domain\Repository\BlogRepository
 * @inject
 */
protected $blogRepository;
```

When the code is run the blogRepository property is null. The blogRepository object isn't being injected, which in turn gives a "Call to a member function findAll() on a non-object" error.

I'm posting this issue here cause no one seems to be monitoring the getting started issue tracker
