

TYPO3.Neos - Bug # 44138

Status:	Resolved	Priority:	Must have
Author:	Aske Ertmann	Category:	
Created:	2012-12-19	Assigned To:	
Updated:	2013-01-29	Due date:	
Subject:	Using the tree to navigate gives random 303 redirects		
Description			
<p>When using the page tree to navigate after some page reloads some of them return a 303 redirect due to the security framework not authenticating the backend controller and thus redirecting to the login page. Right now this is solved in a very bad way by reloading the page assuming that the page structure has changed, which of course it hasn't, but think that because the fetched page is the login page.</p> <p>The page reload is done in contentmodule.js line 456.</p> <p>See screenshots for more info</p> <ul style="list-style-type: none">- http://i.imgur.com/Q6tVA.png- http://i.imgur.com/H8CWt.png

Maybe that is fixed, as the root cause might be the <https://review.typo3.org/#/c/17582/> ?

#2 - 2013-01-29 15:37 - Aske Ertmann

- Status changed from New to Resolved
- % Done changed from 0 to 100

Can't reproduce the problem so it was possibly fixed by that change or by this change <https://review.typo3.org/#/c/17246/>
