TYPO3.Fluid - Bug # 44140

Status:	Resolved	**Priority:**	Should have
Author:	Aske Ertmann	**Category:**	ViewHelpers
Created:	2012-12-20	**Assigned To:**	
Updated:	2014-04-03	**Due date:**	
Has patch:	No		
Affected Flow version:	Git master		
Subject:	Unlucky JavaScript syntax can break inline tags		

Description

After troubleshooting a problem with econic, we have found an issue that can break the parsing of inline tags. The problem originated from using JavaScript in a template, which broke all inline view helpers after the JavaScript. After boiling down to the core problem, it seems that it doesn't have anything to do with the JavaScript itself but instead using {} and indentation.

The original issue source: http://pastebin.com/pkCjwUHd

Snippets for reproducing the problem:
https://gist.github.com/4341615
https://gist.github.com/4341668

In my case I needed at least 16 tabs or 16 spaces for it to break, but econic only needed 13.

The result in both cases is:{collection -> f:count()}{f:count(subject: collection)}
