

TYPO3.Flow - Feature # 44258

Status:	Resolved	Priority:	Should have
Author:	Soren Malling	Category:	Package
Created:	2012-12-30	Assigned To:	Soren Malling
Updated:	2013-04-05	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Subject:	Set packageType when creating new package		
Description			
<p>When calling packageManager->createPackage you have no way to define what package type you are creating.</p> <p>By adding a fourth argument "packageType" with a default value to "typo3-flow-package" one can use createPackage to create "Sites" and similar. The TYPO3.SiteKickstart package is lacking this feature, and sites are created in the Sites folder but in the composer manifest it's named "typo3-flow-package".</p> <p>The package type information can either be put to the MetaData ({get set}PackageType()) object passed around or as a argument (mentioned above).</p> <p>First patchset will be pushed later for discussion</p>

Revision bb742c5a - 2013-04-05 16:44 - Soren Malling

[FEATURE] Set packageType when creating new package

When calling packageManager->createPackage you have no way to define what package type you are creating.

This allows for ex. SiteKickstarter to set correct package type in composer manifest
