Affected Flow version: (any)			
Subject:	Apc Cache backend has side effects		
Description			
If two caches use the APC cache backend, one cache can write and get entries from the other by just using the same key! see: http://forge.typo3.org/issues/38135 and patch https://review.typo3.org/#/c/12145/8

[BUGFIX] Avoid side effects in APC cache backend

When more than one cache was using the APC cache backend, use of the same entry identifiers would cause side effects, as the frontends would access the same entries.

This is fixed by including the cache identifier in the prefix hash.
