TYPO3.Flow - Bug # 44496

Status:	Resolved	**Priority:**	Must have
Author:	Christian Müller	**Category:**	Persistence
Created:	2013-01-14	**Assigned To:**	Karsten Dambekalns
Updated:	2013-01-14	**Due date:**	

PHP Version:	
Has patch:	No
Complexity:	
Affected Flow version: Git master	

Subject:	New doctrine.annotations classes are proxied but should not

Description

doctrine.annotations was moved out of Doctrine.Common and so aren't excluded from object management anymore. With that fatal errors occur even when just calling the flow command.

[BUGFIX] Exclude Doctrine Annotations and Collections from reflection

Doctrine split Annotations and Collections from the Common package,
now the exclusion of those packages from reflection is updated.

Fixes: #44496
Releases: master

Revision 4d27277a - 2013-01-15 10:08 - Karsten Dambekalns

[BUGFIX] Lock Doctrine ORM to version 2.3.x

This change locks the Doctrine ORM to version 2.3.x to avoid unwanted
changes from sneaking in.

To be on the safe side, YAML and Dom Crawler from Symfony are locked
down as well (2.1.x and 2.2.x respectively).
