PHP Version:			
Has patch:			
Complexity:			
Subject:	Improve UriBuilder		
Description			
As discussed in the mailing lists, the current UriBuilder is not really flexible and extensible. Besides it does not follow the FLOW3 CGL ("URIBuilder" should be "UriBuilder", "URIFor()" => "uriFor()"). In Extbase the UriBuilder is already rewritten (See #3981). These changes need to be "forward ported" to FLOW3. Patch follows.

BTW: The patch even brings some new features like \$uriBuilder->setAddQueryString() and \$uriBuilder->setArgumentsToBeExcludedFromQueryString() which will be useful for complex scenarios

BTW²: The patch resolves #3987 too.

If the patches won't apply cleanly, you can replace the files manually (see attached zip archives)

#7 - 2009-09-07 15:25 - Bastian Waidelich

- File 4457_Fluid_v2.patch added

Attached you'll find a tweaked version of the Fluid patch:

Link/ActionViewHelper & Uri/ActionViewHelper did not call reset() on UriBuilder before creating the URI.
