Sprint Focus:			
Subject:	Editing file properties and pushing the delete button in docheader leads to exception		
Description	It should either not be possible at all to delete the record, or the indexing handling should take the deleted flag into account		
Related issues:

History

#1 - 2013-01-16 18:30 - Helmut Hummel

- Subject changed from *Editing file properties and pushing the delete button in docheader leads to exeption* to *Editing file properties and pushing the delete button in docheader leads to exception*

#2 - 2013-01-18 09:26 - Andreas Wolf

What exception exactly? Is the problem that the now stale index record is not found anymore?

IMHO deleting the index record should a) be forbidden altogether or b) also delete the file.

#3 - 2013-02-03 16:26 - Philipp Gampe

If I have a deleted=1 in sys_file, I cannot edit the file properties, but I get a message, then I do not have permissions to edit the record.

#4 - 2013-02-12 21:55 - Helmut Hummel

- Status changed from *New* to *Closed*

Closing this one as the UI does not allow deleting the file any more
