

TYPO3.Fluid - Feature # 4460

Status:	Resolved	Priority:	Should have
Author:	Bastian Waidelich	Category:	ViewHelpers
Created:	2009-09-04	Assigned To:	Bastian Waidelich
Updated:	2010-10-20	Due date:	
Has patch:			
Subject:	Add GroupedForViewHelper		
Description			
Provide a view helper that allows to iterate through values and group the result by a given key. This might look like:			
<pre><f:groupedFor each="{fruits}" as="fruitsOfThisColor" groupBy="color" groupKey="theColor"> <h3>{theColor}</h3> <f:for each="{fruitsOfThisColor}" as="fruit"> {fruit.name}
 </f:for> </f:groupedFor></pre>			
Patch follows.

Revision 89c28b46 - 2009-08-31 15:56 - Robert Lemke

[+FEATURE] FLOW3 (AOP): Parse errors in AOP proxy code (introduced by a potential bug) will now be treated properly by throwing a meaningful exception.

[-FEATURE] FLOW3 (Configuration): Removed support for PHP-based configuration files. This caused a lot of overhead and in practice we want everyone to use YAML files anyway.

[+FEATURE] FLOW3 (Configuration): Implemented support for cached ("compiled") configuration. When the new FLOW3.yaml option "configuration: comileConfigurationFiles" is turned on, all configuration will be compiled into a PHP file which from then on is read instead of parsing the YAML files everytime. Please see the updated documentation for more information. Resolves #4460

[~TASK] FLOW3 (Configuration): Completely refactored the Configuration Manager and a few related classes. Its methods now each fullfil a clear purpose and work more effective. The method names now also better describe what each method is doing. Resolves #2711

[-TASK] FLOW3 (Configuration): Removed the WritableSourceInterface - this is now a standard feature of a configuration source.

[+TASK] FLOW3 (Core): Refactored and cleaned up the FLOW3 Bootstrap. Constants are now defined by a static method and all configuration related functionality has been moved to the Configuration sub package. Also replaced the evil die() calls by more handsome exit() calls. Relates to #2117

[+TASK] FLOW3 (Object): Moved some object initialization code from the Bootstrap to the Object Manager and further cleaned up the Object Manager's code. Wrote additional tests - now this class has 100% test coverage. Relates to #2117

[+API] FLOW3 (MVC): Added a few @api annotations to properties of the AbstractController and ActionController.

[-API] FLOW3 (Utility): Removed the getSAPIType() method from the Environment class. Just use the constant FLOW3_SAPITYPE instead. Resolves #3567 and relates to #2117.

Revision c0d0f79d - 2009-09-16 18:48 - Bastian Waidelich

[~TASK] Fluid: tweaked exception that is thrown when trying to iterate through non-traversable objects in ForViewHelper

[~TASK] Fluid: fixed typo in ForViewHelperTest

[+FEATURE] Fluid: added CycleViewHelper. Resolves #4458

[+FEATURE] Fluid: added GroupedForViewHelper. Resolves #4460

[+TASK] Fluid: added test case for PaddingViewHelper. Relates to #4459
