

TYPO3.Welcome - Bug # 44670

Status:	Resolved	Priority:	Could have
Author:	Axel Böswetter	Category:	
Created:	2013-01-20	Assigned To:	Karsten Dambekalns
Updated:	2013-03-19	Due date:	
Affected Flow version: Flow 2.0.0 beta 1			
Subject: JS in Welcome Package broken			
Description			
<p>Hi,</p> <p>I've just installed the 2.0b1 in a VM and recognized that the javascript in the welcome package seems to be broken. The mootools core v1.2.2 seems to be buggy as it does not return the first h2 element via element.getFirst() but the ".tab" div itself, which results in non object error after element.getFirst('h2). It also results in a broken layout, as the "tab-*" css classes are not correctly assigned so that the stylesheets in the Styles.css don't apply correctly.</p> <p>Just replace the mootools library with the latest one and everthing seems to be fine again. I used the latest mootools-core-1.4.5-full-compat-yc.js from the mootools website.</p> <p>This is just cosmetical, I know, but normaly it's the first part of Flow every new user sees.</p> <p>Regards, Axel</p>

[BUGFIX] Switch welcome site to jQuery for consistency

The welcome site now also uses jQuery as JavaScript library.
Additionally folder names were adapted to match the best practice proposal we have.

What browser are you using? It works fine here, with Chrome...

#2 - 2013-01-25 12:24 - Adrian Förder

Rafael <http://forge.typo3.org/users/38109> just came up with it and I came with the following conclusion:

On Firefox 18, MooTools 1.2 behaves the following:

```
1<div>
2 <div class="tabs">
3 <div class="tab">one</div>
4 <div class="tab">two</div>
5 </div>
6</div>
```

```
1document.getElements('.tab') -> [div.tabs, div.tab, div.tab]
```

This is incorrect as it must of course only return the actual ".tab" items.

See this for a comparison: <http://jsfiddle.net/aAnit/>

In Browsers < FF 18 this does not happen; so does not Mootools 1.4.

I'd strongly recommend to update to MooTools 1.4; or, if you like, to jQuery (however I personally prefer MooTools ;)
