[BUGFIX] Show image upload errors and disable upload for wrong types

When selecting images that do not match the accepted filetype of the
uploader an error is shown and the upload button is disabled.

Additionally the image extensions "jpeg" and "gif" are supported.

Hi Christopher,

I have just tried to upload an image in the latest master from GIT. It worked out perfectly for me using the latest version of Firefox and Google Chrome.

Take a look a the attached screenshot I made.

Hi Mattias,

thx I'll have a look at the problem again. The "Upload!" button just didn't work because the file list was empty on upload after choosing an image.

- Subject changed from Image upload is not working, button "Upload!" is disfunctional to Image upload of some filetypes is not working, button "Upload!" is disfunctional

- Priority changed from Must have to Should have

Well it was my image extension (.jpeg) that was not accepted and did not show any visible error. So I rephrased the issue description.

With another image the upload worked as expected.
