PHP Version:	5.3		
Has patch:	No		
Complexity:			
Subject:	Support stream resources as content for HTTP Request		
Description	If the HTTP Request would support stream resources instead of strings for setContent() and the CurlEngine would take this into consideration, files could be sent with curl through its INFILE feature.

[FEATURE] Support streams as Request content

This patch enhances the setContent() method of the HTTP Request class to accept stream resources, additionally to plain strings. Additionally the CurlEngine now detects a stream and takes advantage of cURL's INFILE feature.

That way (bigger) files can bypass PHP when sent through a request with cURL.
