[BUGFIX] Fix security-related functional test failures

The change I724c1b352dd1807ba53b1e336f2d90e90360ff4d introduced some test failures. This change takes care of the failing functional tests.

It does that by:

- changing the order in which security is set up in the

FunctionalTestCase provided by Flow.

- setting the "current request" again after a call to clearContext() in ContentSecurityTest
- adjusting the expected exception in MethodSecurityTest in two places
