Subject:	Use Setx instead of Set		

Description

Getting Started Guide Chapter 6
When you set the environment variable in windows using Set, the variable isn't persistent, it disappears when you close the command window or console.

Use Setx instead. Its syntax is slightly different

    c:\> setx FLOW3_CONTEXT "Development"
    c:\> setx FLOW3_ROOTPATH "C:\xampp\htdocs\tutorial"
    c:\> setx FLOW3_WEBPATH "C:\xampp\htdocs\tutorial"

btw shouldn't the WEBPATH point to the Web folder inside the Tutorial directory
