

TYPO3.Flow - Feature # 44891

| | | | |
|--|--|---------------------|-------------------|
| Status: | New | Priority: | Should have |
| Author: | Ondrej Hatala | Category: | MVC - Routing |
| Created: | 2013-01-28 | Assigned To: | |
| Updated: | 2014-05-14 | Due date: | |
| PHP Version: | | | |
| Has patch: | No | | |
| Complexity: | | | |
| Subject: | Routes should be able to enforce http/https protocol | | |
| Description | | | |
| <p>It should be possible to set http/https protocol for each route separately (for e.g. for the checkout page of the e-shop).</p> <p>-</p> <pre>name: 'Checkout' uriPattern: 'checkout' defaults: '@package': 'Eshop' '@controller': 'Checkout' '@action': 'index' '@format': 'html' '@protocol': 'https'</pre> <p>Default behaviour should be to use http. If https is specified for the route and you arrive through http, automatic redirect to https should ensue.</p> | | | |
