Subject:	Explore: Usage of Touch Screens for Neos		
Description			
As a normal user, I want to use Neos with a tablet or another touch-enabled device.			
DoD:			
<ul style="list-style-type: none">- Which guidelines do we need to follow in order to make Neos usable on a touch device?- Try out Neos on an iPad and list the problems- Check both the Content Module and also the remaining backend (e.g. Management Module)
