Status:	Accepted	Priority:	Should have
Author:	Robert Lemke	Category:	Content Editing
Created:	2013-01-29	Assigned To:	Rens Admiraal
Updated:	2013-08-09	Due date:	
Subject:	Keyboard shortcuts for content editing		
Description			
As a content editor I want to create new content elements and navigate with keyboard shortcuts in order to stay focussed and don't interrupt the writing flow			
Definition of done:			
<ul style="list-style-type: none">- when the focus is on an existing content element, I can open the "create new element" flyout ("+" icon) by pressing CTRL-N- I can select the type of the content to create by using the arrow keys and pressing enter- I can close the dialog by pressing ESC- when the cursor is at the end of the text I can switch to the content element below by pressing the arrow-down key- when the cursor is at the beginning of the text I can switch to the content element above by pressing the arrow-up key			
Subtasks:			
Task # 45028: Document available keystrokes			Accepted
Task # 44986: The popover dialogs are not closing anymore since a regression introduced...			Closed
Task # 44922: Change content element selection on 'TAB'			Under Review
Task # 44935: Add keystroke for new content element after			Under Review
Task # 44934: Add cut / delete / copy / paste actions			Under Review
