[BUGFIX] Reset legacy fields if no relations are found

If you add multiple images to a tt_content element but mark all of them hidden, an image is shown which has the uid of the number of images added to the element.

This is the case because TYPO3 puts the relation count in the field and the frontend adapter service does not reset the field if no relations are found.

The solution is to set the legacy fields in any case.

This change adds a test which fails without a fix and another test which shows that the original behaviour is not affected.

Resolves: #44988

Releases: 6.0, 6.1
