Subject:	Make complex, interactive custom content types possible		
Description			
<h3>Make complex, interactive custom content types possible</h3>			
<ul style="list-style-type: none">- Target Audience: integrators who want to configure custom content types like image sliders- Responsible: The Whole Neos Team- Implemented by: The Whole Neos Team- Amount: continual. done on voluntary basis- Version: must have for 1.0- Planned Implementation Timeframe: continual.			
Motivation			
Website content does not only consist of text, images and other static content types, but also of e.g. image or content sliders, accordions, or other interactive elements such as time sliders. We want to make such more complex content elements editable.			
Goal			
We want to test building complex content types such as content sliders or accordions. The found obstacles should be solved, and the resulting solution should be documented in the Neos Integrator Guide.			
Deliverables			
<ul style="list-style-type: none">- build at least three complex content types- fix bugs which occur during this phase- document the creation of such complex content elements in the Neos Integrator Guide
