[BUGFIX] Remove delete button for sys\_file

The edit view of file meta data currently has a delete button, which sets the record of this file to deleted, but does not delete the file itself.

It might be useful at some point to use this to implement some recycler functionality, but currently the FAL layer has no support for it and a file with a deleted meta data record is an inconsistent state which has to be avoided by all means.

Resolves: #45065

Releases: 6.0, 6.1

### #1 - 2013-02-01 11:29 - Gerrit Code Review

- Status changed from Accepted to Under Review

Patch set 1 for branch **TYPO3\_6-0** has been pushed to the review server.

It is available at <https://review.typo3.org/17916>

### #2 - 2013-02-01 11:31 - Gerrit Code Review

Patch set 1 for branch **master** has been pushed to the review server.

It is available at <https://review.typo3.org/17917>

### #3 - 2013-02-01 12:32 - Anonymous

- Status changed from Under Review to Resolved

- % Done changed from 0 to 100

Applied in changeset commit:dc1c32715077cb9eb0f31569f0e4ca49a03c252f.

### #4 - 2013-02-01 21:11 - Ingo Renner

- Category set to File Abstraction Layer (FAL)

- Status changed from Resolved to Needs Feedback

- Assigned To set to Helmut Hummel

I agree with the problem of the inconsistent state, but wouldn't the correct solution be to hook into TCEmain, monitor sys\_file deletes and then also remove the file? Simply merging this one doesn't seem right to me...

The whole file/ data handling needs to be re-thought with FAL. There are a still a lot of things to do in this area.  
Any help in this area is appreciated. Feel free to work on that.

Hiding the delete button is very effective with minimum amount of impact and effort to avoid accidental removal of the record.

Please open new tickets for further improvements in this area.

**#6 - 2013-02-03 07:48 - Ingo Renner**

Agreed. I might have a 6.0 project soon, would be happy to help.
