Has patch:	No		
Complexity:			
Subject:	Allow "custom generic" object validators		
Description			
Right now a GenericObjectValidator will be built for objects and then a custom validator will be used. But that custom validator is looked up following a strict rule, so a "custom generic" validator is not possible currently.

Revision 7f51878c - 2013-03-21 14:07 - Karsten Dambekalns

[FEATURE] Allow PolyType custom validators to be used

This introduces a new PolyTypeObjectValidatorInterface. When building base validator conjunctions for a type, all implementations of that interface will be asked if they canValidate() the type.

This enables the writing of custom validators that act on multiple types.

Resolves: #45167

Releases: master

Revision 3761b8f9 - 2013-05-15 23:40 - Karsten Dambekalns

[BUGFIX] Fix failing ValidatorResolverTest

The PolyTypeObjectValidator change broke a number of changes, because it was not adjusted to the static method result compilation changes merged since it was created.
