Updated:	2013-07-01	Due date:	
PHP Version:			
Complexity:	medium		
Sprint Focus:			
Subject:	Can't view content in a non-visible column on a page		
Description			
<p>If you create several layouts for BE pages and give editors the ability to change page layouts, if the layout is changed after content has been created to a layout that doesn't have all the same columns as before, content that is not hidden or deleted is completely invisible. No one can see it is there.</p> <p>There needs to be away to see this content, and edit the content so that editors can delete or move it to other columns.</p>

#1 - 2013-02-14 10:27 - Patrick Broens

- Tracker changed from Bug to Feature
- Category set to Backend User Interface
- Status changed from New to Needs Feedback
- Target version set to 6.0.2
- Complexity set to medium

In the "List" module, the elements are available and can be moved to another column.

I suppose you want something like Templavoila does with "Unused elements" in the "Page" module? That's not a bug, but a new feature ;-)

It's already discussed in #22903

#2 - 2013-07-01 20:42 - Jigal van Hemert

- Status changed from Needs Feedback to Closed

Closed as duplicate of #22903 .
