TYPO3 Flow Base Distribution - Bug # 45413

Status:	Under Review	**Priority:**	Should have
Author:	Rens Admiraal	**Category:**	
Created:	2013-02-12	**Assigned To:**	Rens Admiraal
Updated:	2013-12-10	**Due date:**	
Affected Flow version: Git master			
Subject:	Overriding boolean properties using Objects.yaml is broken		

Description

When a boolean property is overriden like for example:

    TYPO3\Flow\Mvc\Routing\UriBuilder:
      properties:
        linkProtectionEnabled:
          value: FALSE

the generated code is incorrect. The TRUE value becomes a call like:

    $this->setLinkProtectionEnabled(1);

and the FALSE value becomes:

    $this->setLinkProtectionEnabled();

The 1 being used as TRUE will still work in PHP of course, the FALSE value will break if the argument is required.

[BUGFIX] Correctly handle boolean values with property injection

This change fixes a bug in the property injection where an empty string
or 1 are used for representing a boolean value. This change forces the
value to be TRUE or FALSE when the value configured in Objects.yaml
is a boolean value.
