

## TYPO3.Flow - Task # 45430

<b>Status:</b>	Closed	<b>Priority:</b>	Should have
<b>Author:</b>	Sören Rohweder	<b>Category:</b>	MVC - Routing
<b>Created:</b>	2013-02-13	<b>Assigned To:</b>	Bastian Waidelich
<b>Updated:</b>	2013-09-04	<b>Due date:</b>	
<b>Sprint:</b>			
<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Subject:</b>	Throw Exception when controller for routing configuration does not exists		
<b>Description</b>	<p>When developing Flow applications and creating the routing configuration it's a problem to find errors in the configuration when a simple typo in the controller is hidden by ignoring the absence of the named controller in the Routing.yaml.</p> <p>It would be nice to receive an exception in case the mentioned controller in the Routing.yaml does not exist.</p>		

### History

- Status changed from New to Needs Feedback

Hi Sören,

could you please add more details (e.g. your routing setup and the exception you get/expect)?

In development context you should get an exception like the following if a controller/package does not exist:

No controller could be resolved which would match your request. Package key: "foo.bar", controller name: "baz"

#### #2 - 2013-09-04 11:12 - Bastian Waidelich

- Category set to MVC - Routing

- Status changed from Needs Feedback to Closed

- Assigned To set to Bastian Waidelich

Closing due to missing feedback. Feel free to comment/re-open
