Subject:	Different tree types (nodes)		
Description			
<p>It would make sense to support more than just pages in the tree view so it would be possible to get an overview of e.g. news or blog posts in the tree panel ordered by date like Year > Month (> Day). This is a way of introducing creation, deletion, navigation of non pages, but node types that can be filtered naturally and would usually act as a page on its own.</p> <p>The ordering should be configurable and support dates or the default node hierarchical structure.</p>
