

TYPO3.Flow - Bug # 45463

Status:	Resolved	Priority:	Should have
Author:	Karsten Dambekalns	Category:	MVC - Routing
Created:	2013-02-13	Assigned To:	Bastian Waidelich
Updated:	2013-03-20	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Git master			
Subject:	Routing includes object arguments even though it should not		
Description			
Given this route as the only active route:			
-			
name: 'foo'			
uriPattern: 'foo/{@action}'			
defaults:			
'@package': 'Acme.Demo'			
'@controller': 'Foo'			
'@action': 'index'			
and a controller with this action:			
<pre>/** * @param \Acme\Demo\Domain\Model\Foo \$foo * @param string \$bar */ public function removeBarAction(Foo \$foo, \$bar) {}</pre>			
The following all works fine and results in a link being built (foo is an object):			
<pre><f:link.action action="removeBar" arguments="{foo: foo}"> <f:link.action action="removeBar" arguments="{xyz: foo}"> <f:link.action action="removeBar" arguments="{foo: foo, bar: foo}"></pre>			
But this does not work (bar is a string):			
<pre><f:link.action action="removeBar" arguments="{foo: foo, bar: bar}"></pre>			
The following happens inside the router:			
<pre>https://www.evernote.com/shard/s55/sh/f3c49923-52d3-463e-848c-d68af1dbb17b/0e0c1426437d6808ba8f129a752760b6/res/6d01d ce-dae0-49f1-b42e-02f641c8832f/skitch.png https://www.evernote.com/shard/s55/sh/77505b48-94fb-4f1e-8334-7e6d8ac32e5a/b84536fc44919f417b5c4aaf4fef2e0e/res/9baba34 -c2ed-4474-86fe-49c59c6431f7/skitch.png</pre>			
So the arguments that are <i>objects</i> are considered internal, because there <code>__</code> is involved...

Revision 85ceb84e - 2013-02-26 11:30 - Bastian Waidelich

[BUGFIX] Routing includes object arguments even though it should not

Route::resolve() considered "__identity" arguments as internal and ignored them, if they were not part of the respective Route defaults or uriPattern.

This change fixes this by only iterating through sub requests (marked with a "--")
