Updated:	2013-04-28	**Due date:**	
Subject:	Allow string node paths in node link/uri ViewHelpers as DocCommented		
Description			

the DocComment of Neos' link.node and uri.node says also a node path was accepted which is currently not true.

Revision 95bdd493 - 2013-04-26 12:21 - Adrian Föder

[TASK] Allow also node paths for Uri- and Link-NodeViewHelpers

As already being annotated, this patch allows also string node
paths as input argument, for example::

    <n:link.node node="/main/example/imprint">Imprint</n:link.node>

Possible are paths beginning with ``/``, considered
as an absolute node path; paths starting with a ~,
interpreted as node paths inside the current site scope;
and those without a leading slash, interpreted
as relative node paths where the first part is considered a
child of the current node.
